

3 Decades of Excellence!

"ADVANCE 2020 LINE OF A SERIES COUNTERFLOW,
INDUCED DRAFT COOLING TOWERS".

India's First Cooling Tower with
"Cooling Technology Institute (USA) Certification."

The Advace 2020 'A Series'

Who else could be the first in India to be certified by the Cooling Technology Institute (USA), if not the country's leader in FRP cooling towers? The *Advace 2020 'A series'*, India's first R & D created and supported FRP cooling towers, has now crossed one more milestone with this prestigious international certification. Right from inception, state-of-the-art technology has been fuelling our growth. We've been constantly upgrading our products to meet the changing needs of our national and international customers and make high performance standards the hallmark of our company, And now, with the CTI certification under our belt, Advace Cooling Towers is poised to further consolidate its presence in international markets as an exporter of world-class FRP cooling towers.

A Revolution

The *Advace 2020 'A Series'* breaks any convention that might have been set prior to its arrival. In fact, the range goes one step further and better its own performance. The series is a result of six years of intense, path-breaking research. We are the only company to peg three stages of R & D as a crucial part of our technical process.

The results are manifold. The *Advace 2020 'A Series'* is modern and modular. It saves energy with best quality motor an Aluminum fan. It boasts a non-corrosive fibreglass towers and FRP louvers. The motor is located outside the tower and therefore easily accessible through a separate platform. The company optimizes investment for the customer; the size of the towers can be increased as per convenience.

Modular Design

- Our cooling towers are modularly structured.
- They ensure scalability that is in tune with changing requirements.
- All available models are designed to suit even the most difficult site dimensions.
- They come with a range of single to multiple cells.

Fan

We offer the widest range of fan and motor combinations.

- Our fans are made of special aluminum alloy.
- High Aerodynamic design to ensure minimum power consumption.
- Blades & hubs are well-tested to ensure trouble-free maintenance.

Motor

- Standard four-pole motors from a reputed manufacturer, to ensure higher efficiency, lower weight and easier availability.

Fill & Drift Eliminators

- 'MM Aqua' (formerly known as Munters) fills used are non-brittle and sag resistant.
- Double-edged fold for additional strength and longer life.
- 'MM Aqua' full length D-15 eliminators to minimize drift loss.

Louvers

- The air inlet louvers are made of FRP to minimize water loss.
- They are aerodynamically designed.

Also Available 100% Corrosion Proof Pultruded FRP Cooling Tower

Note : Design and specification are subject to change without prior notice.
